# EMARO days

- Conferences
- Workshops
- Challenges
- Presentations
- Visits
- Testimonies

Much more than a Master's Programme, EMARO+, European Master on Advanced Robotics, is an active and powerful community of current and future specialists and practitioners. The whole EMARO community - current students, alumni, academic staff, local coordinators, EMARO project managers - will come together for the EMARO Days from 9th to 13th July, in Nantes, France. A wide variety of activities will be on offer: talks, seminars, workshops, poster presentations and challenges; giving members the opportunity to connect and network effectively, to foster research collaboration in robotics, to discuss key issues and plan the future of EMARO.
